DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 4-6, the language therein is not understood. Firstly, it is not clear as to whether "third voltage level" in line 6 is intending to provide antecedent. It appears that --a-- should be inserted before "third". And secondly, there is no support for "each of said first part and said second part" being "connected" to the "third voltage level". In lines 6-7, a "third voltage level" has already been recited in line 6.

Claim 2 is rejected as including the indefiniteness discussed above with claim 1.

Double Patenting

Statutory

It is noted that the following rejection is based insofar as the language in lines 4-6 is understood.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The

Art Unit: 2816

filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-2 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 32 of prior U.S. Patent No. 6,731,151. This is a double patenting rejection.

Non-Statutory

The following rejection is further deemed necessary due to the undetermined nature of this subject matter.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-2 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 32 of U.S. Patent No. 6,731,151. Although

Art Unit: 2816

the conflicting claims are not identical, they are not patentably distinct from each other because such anticipates the connections for the "each of said first part and second part".
